

HPD UNIQUE IDENTIFIER: 1089249280

CLASSIFICATION: 12 36 61.19 Quartz Agglomerate Countertops

PRODUCT DESCRIPTION: Radianz® Quartz Surfaces is comprised of natural quartz, unsaturated polyester resins, and mineral pigments fused together by a precision compression molding process to create a high-quality product. Natural quartz, with purity of 99.9%, is the main component that results in a non-porous and ultra-durable material that is ideal for countertops, kitchen systems, furniture, wallcladding and various other interior finishes for residential and commercial applications. Manufacturer of Radianz®, Lotte is committed to be the "Green Movement" and is constantly striving to improve the environment and keep our nature pristine.

Section 1: Summary

Basic Method / Product Threshold

CONTENT INVENTORY

Inventory Reporting Format	Threshold Level	Residuals/Impurities Evaluation	For all contents above the threshold, the manufacturer has:
☐ Nested Materials Method	☐ 100 ppm	☒ Completed	Characterized ☒ Yes ☐ No
☒ Basic Method	☒ 1,000 ppm	☐ Partially Completed	Provided weight and role.
	☐ Per GHS SDS	☐ Not Completed	Screened ☒ Yes ☐ No
Threshold Disclosed Per	☐ Other	Explanation(s) provided :	Provided screening results using HPDC-approved methods.
☐ Material		☒ Yes ☐ No	Identified ☐ Yes ☒ No
☒ Product			Provided name and CAS RN or other identifier.

CONTENT IN DESCENDING ORDER OF QUANTITY

Summary of product contents and results from screening individual chemical substances against HPD Priority Hazard Lists and the GreenScreen for Safer Chemicals®. The HPD does not assess whether using or handling this product will expose individuals to its chemical substances or any health risk. Refer to Section 2 for further details.

PRODUCT | MATERIAL OR SUBSTANCE | RESIDUAL OR IMPURITY

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- *Basic Inventory method with Product-level threshold.*
- *Nested Material Inventory method with Product-level threshold*
- *Nested Material Inventory method with individual Material-level thresholds*

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard

RADIANZ® QUARTZ SURFACES

PRODUCT THRESHOLD: 1000 ppmRESIDUALS AND IMPURITIES EVALUATION COMPLETED: Yes

RESIDUALS AND IMPURITIES NOTES: The material inputs for Radianz® product are reacted in the manufacturing process preventing any exposure of health hazards of the final product. Radianz® products have earned GREENGUARD® and GREENGUARD® GOLD certifications as low-emitting interior building products, which ensures that the products comply with strict chemical and particle emission criteria for indoor air quality.

OTHER PRODUCT NOTES: All suppliers of the raw materials used in the manufacture of Radianz® are supervised under a strict Lotte quality control program. Materials are inspected by both internal/external examining bodies RoHS (Restricting the use of Hazardous Substances) and NSF (National Sanitation Foundation, USA) ensuring that Staron® manufacturing meets the environmental standards required.

SUBSTANCE NOTES: Inorganic reinforcing filler - percent range would slightly vary due to various colors available. The material inputs for Radianz® Quartz (agglomerated stone) product are comprised of reacted monomers and resins, inert mineral fillers, and colorants. The final product of Radianz® is nontoxic and non-allergic to humans. Quartz engineered stone, etc. have silicosis concerns during the production, therefore all of this type of materials is to be cut, fabricated, polished, etc. in the presence of water.

Section 3: Certifications and Compliance

This section lists applicable certification and standards compliance information for VOC emissions and VOC content. Other types of health or environmental performance testing or certifications completed for the product may be provided.

VOC EMISSIONS	GreenGuard - Gold (previously Children & Schools)	
CERTIFYING PARTY: Third Party	ISSUE DATE: 2007-09-18	CERTIFIER OR LAB: UL
APPLICABLE FACILITIES: Building products and Interior finishes	EXPIRY DATE: 2023-09-18	Environment
CERTIFICATE URL: https://spot.ul.com/main-app/products/detail/5ad1e81d55b0e82d946a0b6f?page_type=Products%20Catalog		
CERTIFICATION AND COMPLIANCE NOTES: Greenguard Gold Standard for Chemical Emissions for Building Materials, Finishes and Furnishings		
OTHER	ANSI/NSF 51-2012 Food equipment materials	
CERTIFYING PARTY: Third Party	ISSUE DATE: 2009-08-25	CERTIFIER OR LAB: NSF
APPLICABLE FACILITIES: Most colors of Radianz® Quartz are NSF/ANSI 51 certified, which proves the product is safe for use in areas of contact with food, such as kitchens and restaurants.	EXPIRY DATE: 2024-08-25	International
CERTIFICATE URL: http://www.nsf.org/		
CERTIFICATION AND COMPLIANCE NOTES: Most colors of Radianz® Quartz are NSF/ANSI 51 certified, which proves the product is safe for use in areas of contact with food, such as kitchens and restaurants.		

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

No accessories are required for this product.

Section 5: General Notes

Radianz® is GREENGUARD Gold certified and is therefore scientifically proven to meet some of the world’s most rigorous, third-party chemical emission standards – helping reduce indoor air pollution and the risk of chemical exposure while aiding in the creation of healthier indoor environments. GREENGUARD Gold certification standard includes health based criteria for additional chemicals and also requires lower total VOC (volatile organic compounds) emissions levels to ensure products are acceptable for use in environments such as schools and healthcare facilities.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,*
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this
