

HPD UNIQUE IDENTIFIER: 50185303040

CLASSIFICATION: 07 12 00 Built-Up Bituminous Waterproofing

PRODUCT DESCRIPTION: TERM Tile Underlayment/Termite Barrier is a non-structural, non-chemical barrier which, when properly constructed as part of the building envelope, acts as a barrier to Termites and other insects, Energy leaks, radioactive Radon gas, and Moisture. Documentation of these attributes can be found at www.polyguardbarriers.com. Additionally, TERM Tile Underlayment/ Termite Barrier fills the traditional role of anti-fracture tile underlayment, helping to prevent cracks in the subfloor from appearing in the tile surface above by absorbing stress created by the crack. Plus TERM Tile Underlayment / Termite Barrier has sound absorbing and insulating qualities making the floor quieter and warmer in winter.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,*
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.
