INVENTORY AND SCREENING NOTES:
Antimicrobial Pesticides Reporting: This product does not contain substance(s) that are intentionally added above the [Product - 100 ppm] threshold to act as antimicrobials.

Glass is a single substance, with CAS number 65997-17-3. The CAS number covers various types of glass. This Pilkington Glass product contains only the single substance soda lime silicate flat glass. The molecular structure of the glass may contain different elements to give it various colors. The glass may be coated during production, either on-line or off-line, to provide extra functionality such as low emissivity or solar control. The coatings are extremely thin and below the 100ppm threshold.

VOLATILE ORGANIC COMPOUND (VOC) CONTENT

VOC Content data is not applicable for this product category.

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard

PILKINGTON FLAT GLASS
