

HPD UNIQUE IDENTIFIER: 5331719168

CLASSIFICATION: 08 11 00 Metal Doors and Frames

PRODUCT DESCRIPTION: Combat rising energy costs with the patented Trio-E, the industry's most energy efficient exterior opening. The Trio-E door is steel stiffened for strength but has achieved an operable U-Factor of 0.34 which is better than most other steel stiffened doors currently available on the market today. Many building owners spend millions of dollars a year on energy bills and the Trio-E represents a chance for them to realize significant savings on a new or retrofit project. Here are the trio of features that make Trio-E so special: Green: One of the lowest operable U-Factor in the industry for a steel stiffened door (U Factor .34 with Mercury 3 Thermal Break Frame) First steel stiffened hollow metal swinging door to qualify for GreenGuard Gold, as well as achieving many sustainable certifications Strong: Steel stiffened core for added strength and durability. Hurricane rated up to +/-100 psf 3'0" x 7'0" single and up to +/-70 psf 8'0" x 8'0" pairs Beautiful: No vertical weld marks on door face sheets so aesthetically pleasing gloss paint can be applied Many door designs and prefinish color options available Manufactured with pride in USA - complies with Buy America / Buy American and other Government / Military requirements. Fire rated up to 3 hours, 16 and 14-gauge face sheets optional

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

No accessories are required for this product.

Section 5: General Notes

This Health Product Declaration was prepared by Sustainable Solutions Corporation of Royersford, PA on behalf of ASSA ABLOY.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,*
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and
