

HPD UNIQUE IDENTIFIER: 769817138176
CLASSIFICATION: 09 30 13 Ceramic Tiling

PRODUCT DESCRIPTION: All Florim USA porcelain tile products are manufactured in a high-temperature kiln process. The temperatures attained there initiate physical and chemical transformations and reactions resulting in the formation of a hard, dense structure characterized by low porosity (<0.5%) that is chemically inert. Florim USA manufactured porcelain tiles, including all brands sold under the Florim USA umbrella, contain no VOCs, are non-flammable, and do not produce smoke or release toxic gases when exposed to elevated temperatures. Their low porosity prevents the absorption of liquids, vapor, toxic substances, or micro-organisms thereby preventing the generation of reactions, putrefaction, or microbial growth and are suitable for use on floors or walls. Thus, the finished product is one of the most durable, environmentally friendly, and long-lasting choices for interior and exterior use.
