

HPD UNIQUE IDENTIFIER: 18219612160

CLASSIFICATION: 07 22 00 Roof and Deck Insulation

PRODUCT DESCRIPTION: ROCKWOOL Toprock® DD is a high density, stone wool insulation board for low-sloped roofs. The product is compatible as the substrate for mechanically-attached (or fastened) roofing systems. With its high impact resistance and dimensional stability, it can be used as a roof insulation or insulating cover board, suitable for all low-sloped roof decks. Toprock® DD will not develop toxic smoke or promote flame spread even when directly exposed to fire, provides excellent acoustic reduction, absorption and impact performance. Rockwool™ is part of Rockwool International A/S, also known as Rockwool Group.

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard

ROCKWOOL TOPROCK® DD: STONE WOOL INSULATION, FLAT ROOFING PRODUCTS

PRODUCT THRESHOLD: 100 ppm	RESIDUALS AND IMPURITIES EVALUATION COMPLETED: Yes
RESIDUALS AND IMPURITIES NOTES: Residuals and impurities were considered following standard industry methods.	
OTHER PRODUCT NOTES: This declaration is based on pre-cured breakdown of the material ingredients. A mixture of chemicals called binder is applied on the stone wool fibers to adhere them together. The liquid binder turns into solid after chemicals react during the curing process. Therefore, hazard warnings on the HPD might not be applicable as the physical state of a chemical changes during the curing process.

Section 3: Certifications and Compliance

This section lists applicable certification and standards compliance information for VOC emissions and VOC content. Other types of health or environmental performance testing or certifications completed for the product may be provided.

VOC EMISSIONS	Not Applicable	
CERTIFYING PARTY: Self-declared APPLICABLE FACILITIES: Milton, Ontario, Canada; Kearneysville, West Virginia, USA; and Marshall County, Mississippi, USA CERTIFICATE URL:	ISSUE DATE: 2021-05-25 00:00:00 EXPIRY DATE:	CERTIFIER OR LAB: Not Applicable
CERTIFICATION AND COMPLIANCE NOTES: Toprock® DD is intended for use in exterior insulation applications. There is no emissions scenario under the current version of CDPH Standard Method V1.2 (Section 01350/CHPS) for exterior products.

CERTIFICATION AND COMPLIANCE NOTES: The reference product for the EPD was Comfortbatt® SS R13. To calculate the product-specific environmental impacts of the products covered by this HPD, use the relevant scaling factor found on page 7 of the EPD (as well as the environmental impacts of the facer, if applicable, which can be found in Appendix A of the EPD). The GWP of non-reference products are also calculated in Appendix B		

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

No accessories are required for this product.

Section 5: General Notes

This HPD covers the following products: Toprock® DD (2", 2.5") and Toprock® DD (>2.5"). These products have the same compositional chemistry, except at different percent by weights. This variance is limited to 10% or less of the total mass of each product.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,*
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.
