

HPD UNIQUE IDENTIFIER: 5506907748352

CLASSIFICATION: 06 06 00 Schedules for Wood, Plastics, and Composites

PRODUCT DESCRIPTION: TRESPA® METEON® FR is a Fire Retardant decorative high-pressure compact laminate (HPL) with an integral surface manufactured using Trespa's unique in-house technology, Electron Beam Curing (EBC). Trespa® Meteon® is a versatile cladding for innovative and functional ventilated façade systems, balconies and sunblind solutions. Trespa® Meteon® panels can be used on their own or in combination with other materials. More information and contact: trespa.com.

Summary of product contents and results from screening individual chemical substances against HPD Priority Hazard Lists and the GreenScreen for Safer Chemicals®. The HPD does not assess whether using or handling this product will expose individuals to its chemical substances or any health risk. Refer to Section 2 for further details.

INVENTORY AND SCREENING NOTES:

Residuals and Impurities were considered based on direct testing via VOC emissions testing by the 3rd party laboratory UL Environment, and supplier SDSs. No Residuals or Impurities are expected to be present at or above the Content Inventory Threshold that returns a GreenScreen score of BM-1, LT-1, LT-P1 or NoGS. SDS may not identify all Residuals or Impurities present in this material that would require reporting on the HPD.

*Form-Specific Hazard: This substance's GreenScreen Benchmark or List Translator score and the applicable hazards are related to particulate inhalation, which is expected to occur only during manufacture, installation, maintenance, or demolition, due to activities such as sawing, sanding, grinding, or intensive cleaning. For this reason, this score is intentionally omitted from the "Contents highest concern" line above. See HPDC's Special Conditions policy for more information.

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- *Basic Inventory method with Product-level threshold.*
- *Nested Material Inventory method with Product-level threshold*
- *Nested Material Inventory method with individual Material-level thresholds*

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard

No accessories are required for this product.

Section 5: General Notes

Trespa® Meteon® FR is a decorative high-pressure compact laminate (HPL) with an integral surface manufactured using Trespa's unique in-house technology, Electron Beam Curing (EBC). Trespa® Meteon® is a versatile cladding for innovative and functional ventilated façade systems, balconies, and sunblind solutions. Trespa® Meteon® panels can be used on their own or in combination with other materials.

Trespa® Meteon® FR offers seven finishes that not only give physical durability to High Pressure Laminate (HPL) panels but also enrich decors with a natural look and feel as well. Each finish is selected to enhance the Trespa® Meteon® FR product, whether it is a Uni Colour, Natural, Wood, Focus, Metallic or Lumen product. Finishes transform the surface, allowing you to play with colour, pattern and texture to achieve your architectural vision.

This HPD applies to all colors, formats, and thicknesses of Trespa® Meteon® FR product range manufactured by Trespa International BV in Weert, the Netherlands and described in a standard delivery program available on <https://www.trespa.info/en/documents/Meteon/Delivery-programme?>

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- *a method for the assessment of exposure or risk associated with product handling or use,*
- *a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
