

IVES - FB31 Series Automatic and FB51 Series Constant Latching Flush Bolts

by Allegion

HPD UNIQUE IDENTIFIER: 62084873

HPD UNIQUE PRODUCT ID: Not provided.

CLASSIFICATION: 08 71 00 Door Hardware

PRODUCT TYPE: Door Accessories

PRODUCT DESCRIPTION: The IVES FB31 and FB51 flush bolts are essential door hardware components specifically designed to secure the inactive leaf of double door systems. These flush bolts are widely used in both commercial and residential settings to enhance security and maintain proper door alignment. The FB31 Series flush bolts will relatch when the active leaf is closed after the inactive leaf has already been closed. On the other hand, the FB51 series flush bolts automatically relatch whenever the inactive leaf is closed. The FB31 Series is available in three configurations: top flush bolt only, bottom flush bolt only, or as a pair containing both top and bottom flush bolts. The FB51 Series, on the other hand, is available as either a top flush bolt only or as a pair of top and bottom flush bolts. With their reliable functionality and wide range of configuration options, the IVES FB31 and FB51 flush bolts are trusted choices for securing double door systems, providing peace of mind in both commercial and residential applications. Both the FB31 and FB51 series are offered in brass and stainless steel bases, providing durability and strength. Additionally, a variety of finish options are available to meet different aesthetic preferences and design requirements.

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 3.0, available on the HPDC website at: www.hpd-collaborative.org/hpd-3-0-standard

MATERIAL CONTENT NOTES: GreenScreen BM-1 and LT-1 scores of constituent alloying elements are listed, but it should be noted that hazard assessment of individual elements is different and not commensurate with hazard assessment of metal alloys, which have different physical and reactive properties, and for which a comprehensive hazard assessment methodology has not been identified that supports the purpose of an HPD. No metal alloy product or supplier HPDs available.

CONDITION WHEN RECOMMENDED OR REQUIRED AND/OR OTHER NOTES: It is recommended that IVES FB31 series automatic flush bolts and IVES FB51 series constant latching flush bolts are installed with a coordinator, such as the IVES COR bar coordinator, as well as a door closer, such as the LCN 4000 series.

LCN 4000 SERIES

MANUFACTURER (OR GENERIC): Allegion

HPD URL: No HPD Available

ACCESSORY TYPE: Other

CONDITION WHEN RECOMMENDED OR REQUIRED AND/OR OTHER NOTES: It is recommended that IVES FB31 series automatic flush bolts and IVES FB51 series constant latching flush bolts are installed with a coordinator, such as the IVES COR bar coordinator, as well as a door closer, such as the LCN 4000 series.

Section 5: General Notes

This HPD covers IVES FB31 series automatic flush bolt and IVES FB51 series constant latching flush bolts with a stainless steel base and a bright stainless steel (629) or satin stainless steel finish (630). Constant latching flush bolts automatically relatch anytime the inactive leaf is closed. Automatic flush bolts relatch when the active leaf is closed after the inactive leaf has already been closed.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard is not:

- a method for the assessment of exposure or risk associated with product handling or use,
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
