

HPD UNIQUE IDENTIFIER: 2517304014848

CLASSIFICATION: 09 53 00 Acoustical Ceiling Suspension Assemblies

PRODUCT TYPE: Metal Suspension System (Acoustical Ceiling)

PRODUCT DESCRIPTION: Kinetics ICC, a spring hanger using one-inch deflection coils, includes a sturdy spacer which secures the spring during installation of the first layer of drywall making system installation easier than when using wire-tie-style ceiling hangers, even saving you on labor. Once the weight of gypsum board compresses the spring, a minimum 11-inch airspace is created between the concrete deck and the isolated ceiling. ICC's channel clip secures standard, 16-guage cold-rolled-channel (CRC) and allows for leveling the ceiling grid system (CRC and 7/8-inch drywall furring channel, typically). ICC combines all the necessary components for high performance noise control, separating layers of mass and creating a deep airspace, while minimizing spring coil resonance and ensuring easy attachment to the deck.

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,*
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.
