

HPD UNIQUE IDENTIFIER: 125627133952

CLASSIFICATION: 09 65 36 Static-Control Resilient Flooring

PRODUCT DESCRIPTION: Premium prefabricated vulcanized dual-durometer rubber flooring for electrostatic dissipative applications. Low-emitting, low-maintenance, slightly embossed surface with multicolored granules. Harmoni/Grain ANT48 has a 3 mm (0.118 in) thickness, and is available in sheets (ASTM F1859; CSI/CSC MasterFormat® 09 65 36.13) or tiles (ASTM F1344; CSI/CSC MasterFormat® 09 65 36.13). Harmoni/Grain ANT48 is manufactured in a facility that has ISO 9001, ISO 14001, ISO 14064 and ISO 50001 certificates, where 100% of the electric energy used comes from renewable sources: water, wind and solar. We take pride in making high-quality rubber flooring that can be utilized in areas with stringent health and safety controls.

CONTENT IN DESCENDING ORDER OF QUANTITY

Summary of product contents and results from screening individual chemical substances against HPD Priority Hazard Lists and the GreenScreen for Safer Chemicals®. The HPD does not assess whether using or handling this product will expose individuals to its chemical substances or any health risk. Refer to Section 2 for further details.

INVENTORY AND SCREENING NOTES:

This HPD is Identified-No because some substances are undisclosed. All substances marked "Undisclosed" are being kept confidential to protect any and all related trade secrets; each substance has been screened* and any human and/or environmental health hazard has been listed in full transparency*, as generated by the HPDC's HPD Builder Tool. *The Struktol AW 5 antistatic additive is a proprietary blend that has only been partially screened; the manufacturer cannot disclose the full composition and percentages for this ingredient, to protect any and all trade related secrets. Please refer to Content Inventory for information on Struktol AW 5.

*Form-Specific Hazard: This substance's GreenScreen Benchmark or List Translator score and the applicable hazards are related to particulate inhalation, which is expected to occur only during manufacture, installation, maintenance, or demolition, due to activities such as sawing, sanding, grinding, or intensive cleaning. For this reason, this score is intentionally omitted from the "Contents highest concern" line above. See HPDC's Special Conditions policy for more information.

Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard

SUBSTANCE NOTES: The Struktol AW 5 antistatic additive is a proprietary blend; the manufacturer cannot disclose the composition and percentages for its product to protect any and all trade related secrets. As is required by law, the manufacturer of Struktol AW 5 must report any chemical hazard in their SDS (Safety Data Sheet), where only Sodium Perchlorate (CASRN 7601-89-0) is reported, conforming to GHS (Globally Harmonized System) for classification and labelling of chemicals; Mondo can only rely on the information it has been provided. To obtain a copy of the Struktol AW 5 SDS, please see Section 6 References for contact information.

CERTIFICATION AND COMPLIANCE NOTES: The emission test is performed after 3 days and after 28 days in a ventilated test chamber following EN 16516 or comparable international standard, for identification and quantification of VOC and SVOC. Certified products are those with the best-in-class low emissions. NOTE: Validity of a certificate is 5 years from the date of issue, with regular re-inspection and re-testing without non-conformities. You may also check Eurofins for all current certified product listings. See Artigo Rubber Flooring - Group II, certificate number IACG-392-01-02-2023.

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

MONDO EC 60	
MANUFACTURER (OR GENERIC): Mondo - Private Label	
HPD URL: https://mondocontractflooring.com/	
ACCESSORY TYPE: Adhesive	
CONDITION WHEN RECOMMENDED OR REQUIRED AND/OR OTHER NOTES: Two-part reactive conductive epoxy adhesive for Mondo electrostatic dissipative rubber flooring. Low-emitting materials, Rule 1168: 10 g/L (VOC). Consult Mondo's technical data sheet for use and instructions. Consult safety data sheet (SDS) for all safety-related details concerning transportation, exposure, handling and use. This product is a private label product manufactured for Mondo; OEM does not have a known published HPD.	

Section 5: General Notes

All substances marked "Undisclosed" are being kept confidential to protect any and all related trade secrets; each substance has been screened* and any human and/or environmental health hazard has been listed in full transparency*, as generated by the HPDC's HPD Builder Tool.

We do not intentionally use red listed ingredients (2024 LBC Red List CASRN Guide) to manufacture our rubber flooring products, which includes but is not limited to harmful chemicals of concern like bisphenol A (BPA), formaldehyde, halogens, heavy metals, isocyanates, phthalates, polyvinyl chloride (PVC), PFAs and PFCs. The LBC Red List is one of multiple publicly available lists that we continuously monitor and screen* (<https://living-future.org/red-list/>).

*The Struktol AW 5 antistatic additive is a proprietary blend that has only been partially screened; the manufacturer cannot disclose the full composition and percentages for this ingredient, to protect any and all trade related secrets. Please refer to Content Inventory for information on Struktol AW 5.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,*
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and
