

HPD UNIQUE IDENTIFIER: 17471168512
CLASSIFICATION: 06 06 00 Schedules for Wood, Plastics, and Composites
PRODUCT TYPE: Laminated, Impact-Resistant Wall Panel (Wall Protection)
PRODUCT DESCRIPTION: Trespa® TopLab® BASE is a conventional decorative high-pressure compact laminate (HPL) manufactured. Trespa® TopLab® BASE has been developed for the most demanding interior vertical and horizontal applications such as cabinetry and wall cladding solutions. It is available in Standard and Fire Retardant grades. More information and contact: www.trespa.com.

Summary of product contents and results from screening individual chemical substances against HPD Priority Hazard Lists and the GreenScreen for Safer Chemicals®. The HPD does not assess whether using or handling this product will expose individuals to its chemical substances or any health risk. Refer to Section 2 for further details.

INVENTORY AND SCREENING NOTES:
Special Conditions applied: [Polymers]

Residuals and Impurities were considered based on direct testing via VOC emissions testing by the 3rd party laboratory UL Environment, and supplier SDSs. No Residuals or Impurities are expected to be present at or above the Content Inventory Threshold that returns a GreenScreen score of BM-1, LT-1, LT-P1 or NoGS. SDS may not identify all Residuals or Impurities present in this material that would require reporting on the HPD.

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

No accessories are required for this product.

Section 5: General Notes

The moisture and impact resistance of Trespa® TopLab® BASE makes it popular with worktop and cabinetry builders for educational and laboratory institutions. Trespa® TopLab® BASE is perfect for cabinets and countertops that get heavy use and frequent cleaning.

This HPD applies to all colors, formats, and thicknesses of the Trespa® TopLab® BASE product range manufactured by Trespa International BV in Weert, the Netherlands, and described in the standard delivery program available on <https://www.trespa.info/en/documents/Meteon/Delivery-programme?r=10>.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,*
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.
