

HPD UNIQUE IDENTIFIER: 1763074048

CLASSIFICATION: 10 71 13 Exterior Sun Control Devices

PRODUCT DESCRIPTION: StruXure, a business unit of The AZEK Company, is the designer and manufacturer of luxury pergolas and cabanas, with the mission to bring the indoors out through sustainable architectural automation and innovation. StruXure's Pergola X is a customizable exterior shade structure with operable louvers that pivot with a full 170-degree range of motion. By adjusting the louvers, the user can let sunlight into the space below or keep sunlight out for complete shade, thereby maximizing the comfort and use of any outdoor space. With the benefits of sky views and ventilation, Pergola X provides protection from direct, unbroken sunlight. Pergola X has been improved and perfected since the company's inception in 2011 and is now available with a smart phone app that lets users control the louvers and myriad other add-ons—like fans, lights, heaters, screens, and sound—from the palm of your hand.

			Provided name and CAS RN or other identifier.

CONTENT IN DESCENDING ORDER OF QUANTITY

Summary of product contents and results from screening individual chemical substances against HPD Priority Hazard Lists and the GreenScreen for Safer Chemicals®. The HPD does not assess whether using or handling this product will expose individuals to its chemical substances or any health risk. Refer to Section 2 for further details.

INVENTORY AND SCREENING NOTES:

*Form-Specific Hazard: This substance's GreenScreen Benchmark or List Translator score and the applicable hazards are related to particulate inhalation, which is expected to occur only during manufacture, installation, maintenance, or demolition, due to activities such as sawing, sanding, grinding, or intensive cleaning. For this reason, this score is intentionally omitted from the "Contents highest concern" line above. See HPDC's Special Conditions policy for more information.

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard

STRUXURE PERGOLA

PRODUCT THRESHOLD: 100 ppm

RESIDUALS AND IMPURITIES EVALUATION COMPLETED: Yes

RESIDUALS AND IMPURITIES NOTES: No known residuals in aluminum profile or coating

OTHER PRODUCT NOTES: The Pergola is configurable and the makeup of a given finished product (pergola) may vary based on the height, width, number of louvers, etc.

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

No accessories are required for this product.

Section 5: General Notes

This HPD covers aluminum structural elements of Struxure Pergola X. The aluminum used is made up of both post-industrial and post-consumer recycled content.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,*
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.
