

HPD UNIQUE IDENTIFIER: 111284357120

CLASSIFICATION: 07 10 00 Dampproofing and Waterproofing

PRODUCT DESCRIPTION: Internal Wood Stabilizer (IWS) reacts with wood to form a subsurface waterproof gel that hardens to a crystalline barrier, making wood permanently non-absorbent to water and other liquids. This reduces the internal moisture of wood, preventing the proliferation of wood decay fungus. IWS is very effective for treating wood that will have direct contact with consistent moisture, such as fence posts, garden boxes and planters, wood siding, fences, and docks or bridges. IWS is a subsurface sealer, and can be used on bare wood, plywood, or even pressure treated wood as long as there is no previously applied sealer. IWS can be used alone as a waterproofing stabilizer with no UV protection, or used as a waterproofing primer and then stained or painted over, increasing the bond and longevity of the stain or paint.

Summary of product contents and results from screening individual chemical substances against HPD Priority Hazard Lists and the GreenScreen for Safer Chemicals®. The HPD does not assess whether using or handling this product will expose individuals to its chemical substances or any health risk. Refer to Section 2 for further details.

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

No accessories are required for this product.

Section 5: General Notes

Timber Pro Coatings USA is located in Portland, Oregon. We have been manufacturing environmentally safe wood and concrete coatings since 1993. Timber Pro Coatings products are sold factory direct and can be sourced by contacting us directly at 888-888-6095 or ordered online via our website: TimberProCoatingsUSA.com

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,*
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and
