

HPD UNIQUE IDENTIFIER: 1106189312

CLASSIFICATION: 05 10 00 Structural Metal Framing

PRODUCT DESCRIPTION: Sure-Board® Series 200W for Steel framing and Series 200W for Wood Framing are steel sheet and medium density fiberboard (MDF) composite products that are installed on steel or wood framed shear walls at points requiring shear. Sure-Board® eliminates use of excess materials and labor, which lowers cost and increases performance. Lateral and elastic displacement at allowable values are significantly less using Sure-Board® Series 200W for wood frame construction. On exterior walls, the use of Sure-Board® Series 200W guarantees your exterior plaster will maintain a consistent thickness without additional furring. CEMCO's Sure-Board products are manufactured to the strict tolerances set forth by the 2021, 2018, 2015, and 2012 IBC, and verified by IAPMO UER 126. All testing for Sure-Board® Series 200W was performed using ASTM E 2126 SPD reverse cyclic test protocol. The steel sheet is No. 22 Gauge/0.027" (0.686 mm) minimum base-metal thickness, complying with ASTM A 653 CS, Grade 33, and is provided with G40 minimum hot-dipped galvanized coating conforming with ASTM A924.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,*
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.
