PERIMETER SEALANT
MANUFACTURER (OR GENERIC): Generic
HPD URL: No HPD Available
ACCESSORY TYPE: Installation Accessory
CONDITION WHEN RECOMMENDED OR REQUIRED AND/OR OTHER NOTES: Once anchored and the door operates smoothly, apply a silicone seal over all anchor fasteners and seal around the perimeter of the door as shown below. The installer is responsible for sealant joint design, material adhesion, compatibility, and other considerations. Consult the sealant manufacturer for recommendations. See the TerraSwing Access Installation and Maintenance Manual for full details: https://prod.sd02.cloud.opentext.com/lmConvServlet/imconv/43a478ef869488ef663d57cc7252f81f0fbaee9f/original?hybrisId=caq3slun58-oldcastle1-p1&assetDescr=Terra%20Swing%20Access%20Installation%20Manual%20_%20pdf

Section 5: General Notes

- Frame: 3 1/4" depth
- Door Leaf: 2-1/4" depth
- Accepts glazing infills from 1/4" to 1-3/4" overall
- Tubular sash
- Flush sash to frame
- Extruded screw spline joinery
- Polyamide thermal break
- Door leaf is corner-keyed, sealed and hydraulically staked
- Outswing operation
- European style hardware and multi-point locks
- In-house anodized and organic finishes
- Single leaf
- Optional integral transom above door leaf
- Optional frame with snap trim to conceal anchor fasteners
- Small 1/2" threshold sits directly on the floor, so you don't have to recess the concrete during installation to accommodate the threshold, saving time and money.
- The threshold's field-installed exterior trim allows for a continuous exterior perimeter seal without relying on a blind seal.
- Adjustable hinges for field adjustment and alignment post-installation.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,*
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
