

HPD UNIQUE IDENTIFIER: 791464480768

HPD UNIQUE PRODUCT ID: Not provided.

CLASSIFICATION: 09 53 23 Metal Acoustical Ceiling Suspension Assemblies

PRODUCT TYPE: Metal Suspension System (Acoustical Ceiling)

PRODUCT DESCRIPTION: The Tate Grid is the future of structural ceiling solutions, specifically designed for high-performing data centers. Pre-engineered and factory produced aluminum structural ceiling grid with continuously threaded 3/8"-16 bottom slot. Grid consists of Main Runners with notches for precise location and connection of coped Structural Tees using four screw connectors. Capable of supporting power modules, light fixtures, cable trays, partitions, and other accessories. Accessories (Connectors, Bolts, Turnbuckles) are included in the report.

Section 1: Summary

Basic Method / Product Threshold

CONTENT INVENTORY

Inventory Reporting Format	Residuals/Impurities Evaluation	For all contents above the threshold, the manufacturer has:
→ Basic Method	→ Completed	
Threshold Disclosed Per	Explanation(s) provided :	Characterized
→ Product	Yes	Provided weight and role.
Threshold Level		Screened
→ 1,000 ppm		Provided screening results using HPDC-approved methods.
		Identified
		Provided name and CAS RN or other identifier.

CONTENT IN DESCENDING ORDER OF QUANTITY

Summary of product contents and results from screening individual chemical substances against HPD Priority Hazard Lists and the GreenScreen for Safer Chemicals®. The HPD does not assess whether using or handling this product will expose individuals to its chemical substances or any health risk. Refer to Section 2 for further details. 	INVENTORY AND SCREENING NOTES:
	Antimicrobial Pesticides Reporting: This product does not contain substance(s) that are intentionally added above the [Product - 1,000 ppm] threshold to act as antimicrobials.
	This product is primarily composed of metal alloys and has been reported using "Option 2: Alloying Element Option" of the forthcoming Metal Alloys special condition. As such, the hazards listed in this HPD are an overestimate due to the unique exposure characteristics of metal alloying elements, specifically related to the minimal solubility, bioaccessibility, and bioavailability once alloyed.

VOLATILE ORGANIC COMPOUND (VOC) CONTENT

VOC Content data is not applicable for this product category.	COMPLIANCE See Section 3 for additional listings.
	VOC emissions: Inherently non-emitting source per LEED®
	CONSISTENCY WITH OTHER PROGRAMS
	No pre-checks completed or disclosed.

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 3.0, available on the HPDC website at: www.hpd-collaborative.org/hpd-3-0-standard

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

No accessories are required for this product.

Section 5: General Notes

Tate Grid is the ideal solution for any application where large, heavy items need to be suspended within a building. Replacing custom-built, on-site structural support systems, such as Unistrut, with Tate Grid can offer many advantages. A structural ceiling allows you to design and specify the support solution in advance and, best of all, it's less expensive and faster to install.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard is not:

- a method for the assessment of exposure or risk associated with product handling or use,*
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
