

HPD UNIQUE IDENTIFIER: 16291145728
HPD UNIQUE PRODUCT ID: Not provided.
CLASSIFICATION: 12 51 00.00 Furnishings: Office Furniture
PRODUCT TYPE: Commercial Furniture
PRODUCT DESCRIPTION: Borrowing the Japanese word for simplicity, and informed by shoji screens and tatami mats, HBF's Kanso is a multilevel seating system that easily adapts to its space and people. Sturdy steel bases come in chrome plate, brass plate, or powder-coated black, white, or gray. High-density foam cushions accept a nearly infinite range of covers. As for the integrated tabletops, choose from dozens of laminates and veneers. Kanso's design lightness fits into any contemporary work and public spaces, accommodating users for activities such as quick confabs, solo brainstorming, or leisurely lunches.

INVENTORY AND SCREENING NOTES:

Special Conditions applied: [BiologicalMaterial]

Any CAS numbers that have not been identified were given to HNI for hazard screening purposes only and are proprietary for their respective supplier(s).

*Form-Specific Hazard: This substance's GreenScreen Benchmark or List Translator score and the applicable hazards are related to particulate inhalation, which is expected to occur only during manufacture, installation, maintenance, or demolition, due to activities such as sawing, sanding, grinding, or intensive cleaning. For this reason, this score is intentionally omitted from the "Contents highest concern" line above. See HPDC's Special Conditions policy for more information.

PFAS DETAILS:

This product does not contain intentionally added PFAS and materials and substances from suppliers are verified to not contain PFAS.

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 3.0, available on the HPDC website at: www.hpd-collaborative.org/hpd-3-0-standard

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard is not:

- a method for the assessment of exposure or risk associated with product handling or use,*
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
