PRODUCT DESCRIPTION: Comfort That Connects Students to Learning Scribble is designed around how students actually behave in classrooms—not how we wish they would sit. Students learn through small movements, posture shifts, and sensory input. Scribble supports that reality with built-in comfort, subtle sensory support, and durable design made for real schools. Instead of asking students to sit still, Scribble gives them permission to move—quietly, naturally, and without distraction—so they can stay focused, regulated, and ready to learn.

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 3.0, available on the HPDC website at: [www.hpd-collaborative.org/hpd-3-0-standard](http://www.hpd-collaborative.org/hpd-3-0-standard)

- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

*Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.*
