The HPD Standard is solely a declaration of product content and direct health hazards associated with exposure to its individual contents. It is not a full assessment of environmental impacts from the life cycle of this product. It is not an assessment of risks associated with actual use of the product. It does not address the potential health impacts of substances used or created during manufacture that do not appear in the final product as residuals, nor substances created during combustion or other degradation processes.

This Health Product Declaration was generated following the requirements of the noted Standard version and is valid for a total of three years after date of issue or three months after a substantive change of product contents occurs. Users should verify that this Health Product Declaration is compliant with the most current version of the HPD Standard. Accuracy of claims made in this Health Product Declaration is the sole responsibility of the listed manufacturer and certifier (if applicable). The HPD Collaborative does not warrant any claim made herein, explicit or implicit. The HPD Standard is an “open standard” developed and managed by the HPD Collaborative, a nonprofit organization. Depending on product SKU there could be varying degrees of dyes used(disperse and basic). Once the final product is produced and the dyes are exhausted into the fabric body (via jet dyeing) there have been no adverse health effects linked to exposer. Please note, dyed/treated fabrics are considered safe to handle for the general public, however there are individuals that can be sensitive to particular fibers, dyes or chemicals.						
Unknown	Unknown	0 - 2 %		U	Y	Stain-Repellent
Unknown	Not disclosed by supplier					
Flouro-chemical is used for the Stain repellent. Due to application process there is slight range expected for the final % of chemistry on the fabric body(end product). Please note, treated fabrics are considered safe to handle for the general public, however there are individuals that can be sensitive to particular fibers, dyes or chemicals.

Cleaning products	
Code "WS" Care method: To prevent soil, frequent vacuuming or light brishing to remove dust and grime is recommended. Spot clean, with a mild solvent, an upholstery shampoo, or the foam from a mild detergent. When using a solvent or dry cleaning product, follow instructions carefully and clean only in well ventilated rooms. Avoid any product which is highly toxic. With either method, pretest a small area before proceeding. Use a professional furniture cleaning service when an overall soiled condition has been reached.
